Education

- 2010–2012 **M.S., Computer Science**, *National Tsing Hua University*, GPA 4.23/4.30.
Research focused on Natural Language Processing and Information Retrieval, including cross-lingual information extraction, grammatical error correction, machine translation, Wikipedia, Google Web1T, and Hadoop MapReduce. Published two research papers in top NLP conferences, participated in two competitive shared tasks, and one journal paper in review (conditionally accepted).
- 2006–2010 **B.S., Computer Science**, *Yuan Ze University*, GPA 3.6/4.0.
Joined EDA Lab and studied FPGA architectures, FPGA technology mapping, and design partitioning for 3D IC. Published two IR, NLP related conference papers.

Languages

- Chinese **Native**
- English **Fluent** ETS TOEFL-iBT: 115 (R:29, L:29, S:29, W:28)

Work Experience

- Standing offers **Software Engineer**, *Trend Micro and Synology*.
- April–June 2012 **Freelance Developer**, *OpenMoko Inc.*
Developed a highly complex Android client application of the social network website www.bitmarq.com for OpenMoko, the startup company that initiated the Openmoko Project for building a open source mobile phones in 2007.
- 2010–2011 **Research Assistant**, *Academia Sinica*.
Developed an Expectation-Maximization based method for cross-lingual ontology mapping, from EHowNet to the Princeton WordNet. The algorithm was implemented on the Hadoop MapReduce platform for efficiency.
- May–Sept. 2010 **Software Engineer Intern**, *0xlab Inc.*
Developed 0xBench in C and Java, the open source Android benchmarking platform and server-side visualization hosted on Google App Engine. 0xBench is now being used by major companies worldwide and ships with Texas Instrument's development boards. 0xlab is a startup company founded by enthusiastic developers who actively contribute to various open source projects including the Android Open Source Project.
- project page: <http://code.google.com/p/0xbench/>
 - android app: <https://play.google.com/store/apps/details?id=org.zerolab.zerobenchmark>
 - server-side: <http://0xbenchmark.appspot.com>

Teaching and Presentation Experience

- Aug.–Dec. 2011 **Teaching Assistant**, CS Dept., National Tsing Hua University.
The 2011 graduate level Natural Language Processing Course.
- 2007–2012 **Cluster Admin/MapReduce Lecturer**, NLP Lab, National Tsing Hua University.
In charge of Hadoop cluster administration and MapReduce programming training.
- Aug.–Dec. 2008 **Teaching Assistant**, CS Dept., Yuan Ze University.
The 2008 undergraduate level Computer Architecture Course.
- 8 Aug. 2011 **Presenter**, *Conference for Open Source Coders, Users and Promoters (COSCUP)*.
Presented project 0xBench in one of the largest OSS conference in Asia. (attendance: 1200)
- 2008–2009 **Lecturer**, PCLab, Yuan Ze University.
Gave talks on Python and MapReduce for the Student Programming Club.

Publications

Conference Papers

Joseph Chang, Richard Tzong-Han Tsai, and Jason S. Chang. WikiSense: Supersense tagging of Wikipedia named entities based on WordNet. In *Proceedings of the 23rd Pacific Asia Conference on Language, Information and Computation (PACLIC)*, pages 72–81, Hong Kong, December 2009.

Joseph Chang, Tzu-Hsi Yen, and Richard Tzong-Han Tsai. Minimally supervised question classification and answering based on WordNet and Wikipedia. In *Proceedings of the 21st Conference on Computational Linguistics and Speech Processing (ROCLING)*, Taiwan, August 2009. The Association for Computational Linguistics and Chinese Language Processing.

Joseph Z. Chang and Jason S. Chang. Word Root Finder: a morphological segmentor based on CRF. In *Proceedings of the 24th International Conference on Computational Linguistics (COLING)*, Mumbai, India, December 2012.

Joseph Z. Chang, Jason S. Chang, and Roger Jyh-Shing Jang. Learning to find translations and transliterations on the web. In *Proceedings of the 50th Annual Meeting of the Association for Computational Linguistics (ACL2012 <20%)*, pages 130–134, Jeju Island, Korea, July 2012. Association for Computational Linguistics.

Task Papers

Joseph Chang, Shih-ting Huang, Ho-ching Yen, Ming-Jhuan Jiang, Chung-chi Huang, Jason S. Chang, and Ping-che Yang. PatentMT: Summary report of team III_CYUT_NTHU. In *Patent Machine Translation Task at NTCIR-9*, Tokyo, Japan, December 2011. National Institute of Informatics, Japan.

Jian-Cheng Wu, Joseph Chang, Yi-Chun Chen, Shih-Ting Huang, Mei-Hua Chen, and Jason S. Chang. Helping Our Own: NTHU NLPLAB system description. In *Proceedings of the Seventh Workshop on Building Educational Applications Using NLP*, pages 295–301, Montreal, Canada, June 2012. North American Chapter of the Association for Computational Linguistics (NAACL).

Journal Papers (in review, conditionally accepted)

Joseph Z. Chang, Jason S. Chang, and Roger Jyh-Shing Jang. Learning to find translations and transliterations on the web based on conditional random fields. *International Journal of Computational Linguistics and Chinese Language Processing (IJCLCLP)*, 2012.

Technical Skills

Research tools	Moses, BerkeleyAligner, SriLM, HMM, EM, CRF, ME, SVM	1-4 years
Hadoop	MapReduce programming	5 years
C, C++, STL	Electronic design automation and more	8 years
Python	nltk, scipy, twisted and more	6 years
Java	Android app development	3 years
Objective-C	iPhone app development	1 year
Matlab	Audio signal processing	1 year
Linux	Desktop and server administration	8 years
Web platform	Google App Engine, Heroku, Amazon EC2	1 year

Selected Awards and Honors

Scholarship	Travel Grants. <ul style="list-style-type: none">○ The Association for Computational Linguistics and Chinese Language Processing○ Department of Information System and Applications, National Tsing Hua University○ Department of Computer Science and Engineering, National Yuan Ze University
First Place	Undergraduate Research Paper Award, Yuan Ze University.
Bronze Medal	National IC/CAD Programming Contest, Ministry of Education. Developed a 3D-IC partitioning algorithm, and implemented in 3000+ lines of C++/STL code. A total of 160 teams participated to compete on runtime and algorithm performance.
Second Place	The 11th Trend Micro Programming Contest, Trend Micro Inc.. Out of 67 teams that participated.
First Place	Fun Taipei Mobile App Contest, Taipei City Government. Developed <i>Taipei Fever</i> , a Taipei City tour guide app for iOS, Android, and WindowsPhone7. (http://taipei.zfever.tw)
Third Place	National Information Security Contest, Industrial Technology Research Institute. Won third place out of 149 teams that participated.
Best Student	Mobile Hero UI Contest, Ministry of Economic Affairs.
Project	Developed <i>Paper Piano</i> , an augmented reality virtual instrument for Android. (http://www.youtube.com/watch?v=kfnd2wnb1Ec)
Honorable	Mobile App Development Contest, Chuang Hua Telecom.
Mention	Developed <i>beFriend</i> , a business card management app for Android.
